

MINI BATTLESHIP GAME

USING JAVASCRIPT

The game would be written in JavaScript, the options would be very limited since the code would be written from scratch.

1. The algorithm will be written from scratch.
2. There will only be three ships for each player.
3. The ships position will be randomly generated by the algorithm.
4. Start Button
 - a. Starts a new game
 - b. Generates two brand new boards
 - c. Resets score
5. The computer's board will be on the right.
6. The entire game will be implemented in JavaScript and CSS.
